

Industry-leading ride control
chosen by OEMs & Fleets for:

✓ **Exceptional Anti-Fade Performance**

Fade decreases the shock's performance causing wheel hop, sway, and uncontrolled movement of the vehicle. Excellent anti-fade performance improves safety and vehicle control, enhanced braking effectiveness, and reduced component and tire wear for driver comfort.

PROTECTS DRIVERS & EQUIPMENT

✓ **Best-in-class Hydraulic Stop**

Without a hydraulic stop, extension limits of the suspension can be exceeded and damage to the shock and air spring may result, requiring replacement parts, labor and downtime.

PROTECTS SHOCKS & AIR SPRINGS

✓ **Anti-Corrosion End Mount Coating**

Excellent end mount anti-corrosion performance means you can save hours of valuable downtime without torching off shocks, getting you back up and running fast!
