HOW TO MEASURE EXTENDED & COLLAPSED LENGTHS OF SHOCK ABSORBERS

Instructions

1. Using the proper measuring points as shown above find the nearest replacement shock absorber from the listing increments of extended length.
2. Identify the proper mounting form the mounting codes and match these requirements by carefully measuring the mounting dimensions (top and bottom) of the shock absorber to be replaced.
3. Carefully take note of the following requirements:
 - a. **Mounting Accessories** - Contents and descriptions of parts are shown in this manual.
 - b. **Dust tubes** - This requirement should be noted in comparison with the shock absorber to be replaced. Shock absorber environment in its application makes this requirement necessary for piston rod protection and extended shock absorber life.
 - c. **Recoil Cutoff and Compression Bumper** - Carefully note these specifications- deviation of length requirements should not exceed $\pm 1/2$ ". These shock absorber designs are footnoted for easy identification.
 - d. **Limited Environment Application** - Most conventional shock absorbers are offered in "straight" construction to fit limited environment applications. These shock absorber designs are footnoted.

SHOCK ABSORBER DIAMETERS

Shown below are measuring points for diameters by type of shock absorber. Refer to the chart below which lists diameters for the various bore sizes available for each type.

DISPOSAL OF OLD OR DEFECTIVE GAS-PRESSURIZED SHOCKS & STRUTS

STORAGE OF USED SHOCK ABSORBERS AND STRUTS

Used struts and shocks should be stored so that any oil leakage will be properly collected. Those containers used to store this product should be labeled "USED OIL".

Used struts and shocks can either be punctured to recycle the shock oil or disposed of in a manner consistent with local or state programs.

RECYCLING OF SHOCK AND STRUT OIL

1. FOR YOUR SAFETY, ALWAYS WEAR SAFETY GLASSES AND PROTECTIVE GLOVES WHEN PUNCTURING STRUTS AND SHOCKS.
2. Securely mount the strut or shock in a vice in the horizontal position. Make sure that the piston rod is fully extended prior to drilling the unit (Fig. #1).
3. Using a 1/16" or 1/8" drill bit, drill a hole in a downward direction approximately 1.0" from the bottom of the strut or shock (Fig #2). It is important to cover the area where the hole is being drilled with a towel or some type of shield to prevent spraying gas and oil upon initial penetration of the drill bit.
4. After the gas pressure is released continue drilling into the inner cylinder of the strut or shock unit, approximately 1/2" deep. Drill a second 1/2" hole near the top of the unit.
5. Remove the strut or shock from the vice and hold it over a container to collect the used oil. Hand stroke the unit to completely purge the oil from the cylinder of the unit (Fig #3).
6. Collect all used oil, **being careful not to mix this oil with any other waste or refuse**. Store in DOT approved containers labeled "USED OIL".
7. Dispose of the remaining strut or shock body and internal parts in accordance with local or state regulations (e.g., scrap metal recycler).
8. Store, dispose, and/or transport used oil in accordance with EPA regulations and your state's used oil program.
