

Shocks, Tires, and Air Springs

WORK TOGETHER & WEAR TOGETHER!

It is important to replace your shocks when replacing tires & air springs, because:

THE TECHNOLOGY & MAINTENANCE COUNCIL RECOMMENDED PRACTICE 643A states that fleets should install new shocks when installing new tires to **maximize** tire life.

WORN SHOCKS

NEW GABRIEL® SHOCKS

Worn shocks can cause **expensive** tire damage such as cupping & can even continue to cause tire cupping on newly replaced tires!

Worn shocks can also cause **catastrophic** air spring damage!
