

Shocks, Tires, and Air Springs WORK TOGETHER & WEAR TOGETHER!

See why it is important to
replace your shocks when
replacing tires & air springs

THE TECHNOLOGY & MAINTENANCE COUNCIL RECOMMENDED PRACTICE 643A states that fleets should install new shocks when installing new tires to **maximize** tire life.

WORN SHOCKS

**NEW GABRIEL®
SHOCKS**

Worn shocks can cause **expensive** tire damage such as cupping & can even continue to cause tire cupping on newly replaced tires!

Worn shocks can also cause **catastrophic** air spring damage!
